VIRTUAL PLATFORM

EXPERIENCES

As a student: VIRTUAL CLASS

The screenshot shows two browser windows. The top window is the main portal for 'Formación On-line Protección Civil' at 'proteccioncivil.enclase.com/lms/'. It features a navigation menu with 'Mis cursos' containing 'Formación General', 'Cursos generales de Protección Civil', and 'Formación Especifica'. A calendar for September 2015 is visible on the right. The bottom window is a 'generalError.jsf' page from 'escuela.proteccioncivil.es', displaying the 'Plan de formación de la ENPC' and contact information for the Escuela Nacional de Protección Civil, including phone numbers and a note about using the system for course management.

Curso Básico Voluntario PC - homologado IVASPE 112/2016

Teacher: Miguel Angel Belenguier
Teacher: Vicent Civera
Teacher: Raul Quesada
Teacher: Alberto Rodriguez

El objetivo del curso, es aportar una formación básica en materia de protección civil, tanto a los voluntarios de nuevo ingreso como a los veteranos incluso a otros colaboradores, con el fin de homogeneizar la formación de la agrupación y de fomentar el trabajo grupal y cooperativo.

Todas las sesiones se inician con una explicación teórica mediante exposiciones magistrales acompañadas de ejemplos aplicados para consolidar conceptos y así dinamizar las clases y facilitar la participación de los asistentes. Tras la sesión teórico-práctica se forman pequeños grupos de trabajo aspirantes con veteranos y se realizan ejercicios que profundizan en el temario. Finaliza siempre el módulo con una prueba de evaluación, con el objetivo de remarcar los puntos más importantes y mantener la atención del alumno a lo largo de toda la sesión.

Este curso básico, atendiendo a las características de los participantes, (voluntarios que trabajan y/o no disponen de un horario flexible), se organiza en módulos que se repiten en las sucesivas ediciones, con el fin de poder recuperar ese 10% máximo permitido que no sea completado. A pesar de las complejidades de organización, con esta premisa, se pretende facilitar una completa formación a todos los voluntarios, y no dejar fuera a nadie que por incompatibilidad de horario no pueda acceder a esta imprescindible y básica formación que con todo derecho, el voluntario está obligado a recibir.

VIRTUAL PLATFORM

□ EVANDE's portal

The screenshot shows the EVANDE eLearning platform website. The browser address bar displays 'evande.coursevo.com'. The website header includes the EVANDE logo and a navigation menu with 'Home', 'Courses', 'Services', 'Statistics', 'Contact', and 'Coursevo'. Below the header, the main content area features a 'Welcome' message and a list of statistics.

EVANDE eLearning platform
A collaborative blended learning platform for supporting and managing learning processes exploiting modern multimedia and communication technologies

Welcome
Welcome to the e-learning multimedia platform of the European project EVANDE!

The e-learning platform aims to offer training opportunities to civil protection volunteers and local authorities' staff in Greece, Italy, Spain and Bulgaria. It supports interactive services between the instructors and the trainees and operates 4 web-seminars (educational programs) on earthquakes, floods, forest fires and European civil protection policies.

Each web-seminar contains a series of courses in which every trainee should register to attend. Registration is free of charge. The web-seminars cover topics such as hazard description; risk assessment; prevention; preparedness and recovery. In addition, the web-seminars present indicative case studies and best practices on civil protection in Europe. The aims, objectives, structure and contents of each course as well as instructions for the attendance are presented in the syllabus of each course. Each course contains various educational units with digital material such as presentations, documents, resources, assignments and assessments.

After successful completion of the training the trainees will receive a certification of attendance. The platform and the courses are available in English, Greek, Spanish, Italian and Bulgarian.

For further information about the EVANDE project and its activities, please visit the [official website of the project](#) or contact the involved partner organizations.

For further information on how to use of the e-learning platform, please watch the video tutorials available [here](#) or contact us for technical assistance (select Contact from the top right menu).

The EVANDE project is co-funded by the European Union Civil Protection Mechanism, Grant Agreement No.ECHO/SUB/2014/693261.

Thank you for your interest!
